

**Complex permeability vs.Frequency**

Initial permeability	$\mu_i$	25°C	650±20%
Saturation magnetic flux density	$B_s$ (mT)	25°C	400
Relative loss factor	$\tan\delta/\mu_i$	25°C	≤15
Relative temperature coefficient	$\alpha_{\mu}$		(×10 <sup>-6</sup> )
Curie temperature	$T_c$ (°C)		
Electrical resistivity	$\rho$		

**Relative loss factor vs.Frequency**
